## **Eco Energy World and Total Solar develops jointly 100 MW Project in Spain**

Eco Energy World (EEW), an international developer of utility scale solar projects, and Total Solar, part of Total group, have agreed to jointly develop a Solar Project of 100 MW, in the province of Valladolid.

The project is scheduled to be fully developed during 2019 and to be constructed early 2020. The project is to be operated and owned jointly by the parties.

Svante Kumlin, Chairman of EEW, says: “We are extremely happy to team up with Total to develop subsidy free solar in Spain, and we look forward to soon to expand our joint portfolio with further projects in Spain and elsewhere in Europe”

Having developed in excess of 1 GW of solar projects in Europe and Australia over the past few years, EEW looks to further leverage its experience in solar project development, project financing and finance structuring, technology expertise and drive further growth in Spain.

### **About Eco Energy World**

*The Eco Energy World Group is a leading international developer of utility scale solar power projects. Since its*

*establishment in 2008, EEW has developed 1,2 GW of solar power projects in Europe and in the Pacific with head offices in London, United Kingdom*
