50 MW UK solar farm sale successfully completed

Eco Energy World PLC has revealed that it has successfully closed the sale of 50 MW Solar farm in Defford to Metka Eng.

Commenting on the sale, Svante Kumlin, CEO of Eco Energy World, said: “This sale reinforces our position in the UK and European renewable energy industry and provides us with the perfect platform to continue to expand our solar PV development in UK.

The company has aspirations to develop more than 500 MW of new solar PV developments in UK the next 2 years.

Kumlin added: “To date, we have developed 250 MW of solar projects in the UK. We have today a large portfolio of early stage projects in the UK, and we are looking to expand our portfolio more. We are committed to making a significant contribution towards helping the UK meet its renewable energy targets and develop more solar subsidy free solar.
